

# Syllabus

## ESC 100 Introduction to Engineering

### General Information

---

**Date**

March 7th, 2018

**Author**

Selim Araci

**Department**

Science and Technology

**Course Prefix**

ESC

**Course Number**

100

**Course Title**

Introduction to Engineering

### Course Information

---

**Credit Hours**

3

**Lecture Contact Hours**

2

**Lab Contact Hours**

2

**Catalog Description**

An introduction to various branches of engineering using descriptive and quantitative perspectives. Topics include modeling and mathematical analysis of basic engineering problems related to chemical, mechanical, and electrical systems with incorporation of topics of sustainability and clean environment. Problem solving, critical thinking, and technical writing skills are emphasized throughout the course.

**Key Assessment**

This course contains a Key Assessment for the AS Engineering Science program

**Prerequisites**

None

**Co-requisites**

MAT 145

**Grading Scheme**

Letter

## First Year Experience/Capstone Designation

---

This course is designated as satisfying the outcomes applicable for status as a  
First Year Experience

## SUNY General Education

---

This course is designated as satisfying a requirement in the following SUNY Gen Ed category  
None

## FLCC Values

---

**Institutional Learning Outcomes Addressed by the Course**

Vitality  
Inquiry  
Perseverance  
Interconnectedness

## Course Learning Outcomes

---

**Course Learning Outcomes**

1. Define engineering and its various branches
2. Identify the various career paths that can be pursued with an engineering degree
3. Discuss the components of a modern engineering education
4. Use engineering analysis tools to solve basic, introductory level engineering problems involving mechanical or electrical systems

## Outline of Topics Covered

---

- I. Introduction to engineering
- II. Branches of engineering
- III. Engineering education

- IV. Mechanical engineering
- V. Linear equations in engineering
- VI. Quadratic equations in engineering
- VII. Trigonometry and vectors in engineering
- VIII. Industrial engineering
- IX. Data analysis using spreadsheet programs
- X. Electrical engineering
- XI. Complex numbers in engineering
- XII. Sinusoids and harmonic signals in engineering
- XIII. Systems of equations and matrices in engineering
- XIV. Derivatives in engineering
- XV. Civil engineering
- XVI. Integrals in engineering
- XVII. Chemical engineering
- XVIII. Biomedical engineering
- XIX. Differential equations in engineering
